

**DECORATIVE. CREATIVE. ON TIME.**

**LOOKING FOR A  
PRODUCTION COMPANY  
THAT WILL WORK  
WITH YOU?**

Our ultimate goal is to deliver quality metal products and quality service.

Having a product that fits your design, and your quality standards, is important. Decron is an expert at fabricating metal components and products for companies across the automotive, commercial, agricultural, and sporting utility industries. From prototyping all the way to delivery, we strive to provide you with quality customer service and quality metal products.

At Decron, we implement Lean principles in our organization. This means that we have a systematic approach to manufacturing that minimizes waste while still remaining productive and at the same time, producing components with consistent quality. Our goal is to reduce production costs for our customers, while giving life to their designs.

**One-stop shop for your metal fabrication needs**

Since our beginnings, we've expanded from metal forming to include a variety of services to fit all of our customers' needs from prototype to production to delivery. Our capabilities include:

- Prototyping
- Laser Cutting
- Welding & Grinding
- Metal Forming
- Powder Coating
- Upholstery
- Packaging & Shipping

## PROTOTYPING DESIGN, CUSTOM FABRICATION, AND POWDER COATING

We started out in 2003 as Custom Steel Designs, building decorative and architectural metal products for our customers, such as railings for stairways and custom decor. In 2018, we shifted our focus to production, manufacturing metal parts for RVs and golf carts, furniture frames, trailer hitches, safety bars, rear seats, and other commercial and agricultural applications.

As our business has grown, we've expanded our capabilities from metal forming and fabrication to include a variety of other services such as prototyping, upholstery, powder coating, and more. Throughout this expansion, we've continued to be committed to quality, inspecting the material we work with before the machining even begins, and fully inspecting every part to ensure it meets our customer's specifications before it leaves our facility.

**For prototyping, quality metal fabrication, and reliable delivery, choose Decron. We build your idea, your way.**

If you're looking for a production company that will work with you and save you time, money, and hassle, then contact us today! We take pride in our work and the quality service that we provide to our customers.
